Lunch Time Python
meets
RSE* Coffee Hour

Join us for a session of Lunch Time Python and the RSE coffee hour!

Next session: *April 23th, 12 PM, Conference room 5/104, Mathematikon*

Python is a very popular - maybe even the most popular - programming language among developers of scientific software. One of the reasons for this success story is the rich ecosystem of available (scientific) libraries. Lunch Time Python** aims at providing a communication platform between Pythonistas to learn about new libraries in an informal setting. Sessions take roughly 30 minutes, one library is presented per session and the code will be made available afterwards. Come by, enjoy your lunch with us and step up your Python game!

The RSE coffee hour aims to bring together RSEs at all career stages! Join us for a cup of coffee and chat about challenges and strategies for developing research software.

*Research Software Engineer = someone who develops their own software as part of their research
